Торіс	Show / Tell	Question	Answer			
Tyres	Tell	Tell me how you would check your tyres to ensure that they are correctly inflated, have sufficient tread depth and that their general condition is safe to use on the road.	Correct tyre pressure settings can be found in the owner's manual. Pressures should be checked using a reliable gauge. Tread depth must be at least 1mm deep, forming a continuous band at least ³ / ₄ of the breadth of the tread and all the way around. There should be no lumps, bulges or tears.			
Front brake	Show	Show me how you would check the operation of the front brake on this machine.	Wheel the machine forward and apply the front brake.			
Brakes	Show	Show me how you would check the operation of the brakes on this machine.	Check for excessive travel on the brake lever and the brake pedal and for unusual play or sponginess.			
Emergency cut out		Show me how you would check the operation of the engine cut out switch.	Operate switch, without the engine being started.			
Rear fog light	Show	Show me how you would switch on the rear fog light and explain when you would use it (if fitted).	Operate switch (turn on ignition and dipped headlights if necessary). Check warning light is on. Explain use.			
Headlight	Show	Show me how you switch your headlight from dipped to main beam.	Operate switch (with ignition or engine on if necessary), check with main beam warning light.
